

Raju Edla
Email: rajupateledla@outlook.com
Contact No: +1 551-362-6534

Professional Summary:

- **Senior IAM Engineer with 7+ years of hands-on experience** designing, implementing, and supporting enterprise Identity and Access Management solutions — spanning IGA platforms (**Saviynt, SailPoint IdentityIQ/ISC**), PAM (**CyberArk**), cloud IAM (**Microsoft Entra ID, AWS IAM, GCP IAM**), and SSO/MFA/federation across regulated financial and healthcare environments.
- Deep expertise in **identity lifecycle management** — designing and automating **Joiner/Mover/Leaver (JML)** workflows, access provisioning and deprovisioning, **SCIM**-based integrations, and **RBAC** aligned with least-privilege and Zero Trust principles — improving onboarding efficiency by **40%**.
- Strong hands-on experience with **Microsoft Entra ID** — **Conditional Access, Identity Governance, PIM**, MFA enforcement (**Microsoft Authenticator, FIDO2**, certificate-based auth), and hybrid identity using **Azure AD Connect** — supporting **50+ enterprise application integrations**.
- Proven experience administering **CyberArk PAM On-Prem (PVWA, CPM, PSM)** — managing privileged account onboarding, password rotation, session recording, and Just-in-Time access, reducing standing privileged access by **30%**.
- Experienced integrating IAM across **cloud and enterprise platforms** — **Office 365, Azure, AWS, GCP, Salesforce, Workday**, and ServiceNow — using **SAML 2.0, OAuth 2.0, OIDC, SCIM**, and REST APIs for standards-based authentication and automated provisioning.
- Proficient in **access certifications, access reviews, and identity governance** — executing review campaigns, enforcing **SoD**, remediating violations, and producing audit-ready evidence for **SOX, HIPAA, NIST 800-53, ISO 27001**, and PCI-DSS.
- Skilled in **PowerShell, Python, and Microsoft Graph API** automation — building provisioning workflows, access reporting, and lifecycle automations that reduced manual IT effort by **50%** and improved service delivery consistency.
- Experienced with **ServiceNow ITSM** for IAM request management, incident resolution, and change management — participated in on-call rotations maintaining **99.9% SLA adherence** for mission-critical identity services.

Certifications:

- **Microsoft Certified: Identity and Access Administrator Associate (SC-300)**
- **Microsoft Certified: Azure Security Engineer Associate (AZ-500)**
- **Saviynt Certified: Identity Security for AI Age (ISAA)**
- Cisco Certified Network Associate Security (CCNA Security)
- **SailPoint Certified: Launch Your Identity Security Career (SailPoint University)**
- **Okta Certified Professional**

Technical Skills:

Identity & Access Management Platforms	Okta (SSO, MFA, SAML, OIDC, OAuth 2.0, Policies, App Rules, IdP), PingFederate, AWS Identity Center, Microsoft Entra ID, SailPoint IdentityIQ, AWS IAM, CyberArk
--	--

Cloud Platforms	AWS (IAM, SSO, Secrets Manager, KMS), Azure (Entra ID, Conditional Access, MFA, Key Vault)
Authentication & Security Protocols	SAML 2.0, OAuth 2.0, OpenID Connect (OIDC), SCIM, LDAP, Kerberos, SPNEGO
Automation & Scripting	Terraform, Bash, Python, Node.js (NodeJS), PowerShell, JSON, YAML, Serverless Computing
Application & API Integration	REST APIs, OAuth 2.0, OpenID Connect (OIDC), SAML 2.0, Infrastructure as Code (IaC), Serverless Platforms
Infrastructure as Code (IaC)	Terraform, Azure ARM Templates, Azure CLI, Azure DevOps, GCP Identity
CI/CD & DevOps	Azure DevOps, GitHub Actions, Jenkins, Docker, Kubernetes, Disaster Recovery Planning
Monitoring & Security Analytics	Performance Monitoring, Capacity Planning, System Availability, Log Analysis, Incident RCA
Compliance & Governance	SOX, HIPAA, NIST 800-53, ISO 27001, GDPR, Policy Governance, Authentication Architecture

Professional Experience:

Client: Transamerica, (Remote)

May 2026 – Present

Role: IAM Engineer/ CIAM Engineer

Responsibilities:

- **IBM ISAM / WebSEAL Administration:** Administered enterprise **IBM Security Access Manager (ISAM) v9-10** and **WebSEAL** — managing **38+ authentication endpoints**, WebSEAL junctions (TCP/SSL/Local), ACL policies, protected object space, and session management; configured **X-header authentication (iv-user, iv-groups, iv-creds)** ensuring seamless identity propagation to backend applications across on-premise and AWS environments.
- **SSO & Federation Engineering:** Designed, configured, and troubleshooted enterprise **SSO integrations using SAML 2.0, OAuth 2.0, and OpenID Connect (OIDC)** — managing IdP/SP connections, SAML assertions, claims mapping, certificate signing lifecycle, and relay state configurations; resolved **AADSTS error codes** and federation failures across 50+ enterprise and SaaS applications.
- **Okta Auth0 & CIAM Platform:** Administered **Okta Auth0 CIAM platform** — managing tenants, applications, SAML/OIDC connections, Actions (custom JavaScript), MFA enrollment policies, and Universal Login flows; supported **customer identity lifecycle** for external-facing Transamerica and Aegon applications.
- **PingFederate Administration:** Configured and supported **PingFederate federation server** — managing IdP/SP connections, OAuth 2.0 authorization server policies, token translators, adapters, and OIDC client configurations; troubleshooted **SSO failures, certificate mismatches, and token validation errors** across enterprise federation integrations.
- **F5 Big IP & Imperva Integration:** Managed traffic flow and authentication routing through **F5 Big IP Load Balancer** — analyzing Virtual Servers, pools (green/red status), SSL termination profiles, and SNI hostname routing; worked with **Imperva DDoS protection and Mtls certificate handling** for external-facing applications; performed NSLookup-first troubleshooting to trace authentication failures.

- **Incident & Change Management:** Managed IAM incidents and changes via **ServiceNow ITSM** — triaging P1/P2 authentication failures, SSO outages, and certificate expiry incidents; executed **Standard, Normal, and Emergency changes** following CAB approval process; maintained **99.9% SLA adherence** for enterprise authentication services.
- **ISAM to Okta Modernization:** Contributing to enterprise **CIAM modernization** — **migrating IBM ISAM to Okta Access Gateway** — analyzing WebSEAL junctions and authentication flows for migration readiness; supporting **OAuth 2.0 client credentials flow** implementation and new SAML/OIDC integrations as part of Transamerica digital identity transformation.
- **Automation & Scripting:** Developed **JavaScript mapping rules and transformation rules** for ISAM token customization; built **PowerShell automation scripts** for certificate rotation and junction management — reducing manual effort by **40%**.

Environment: IBM Security Access Manager (ISAM) v9-10, WebSEAL, Okta Auth0, PingFederate, SAML 2.0, OAuth 2.0, OIDC, F5 Big IP, Imperva, ServiceNow ITSM, AWS, JavaScript (Mapping Rules), PowerShell, SSL/TLS, X-headers, MFA, HAR Analysis, NSLookup, CAB Change Management

Client: Credit One Bank, Las Vegas, USA

May 2025 to May 2026

Role: IAM Engineer/ Developer

Responsibilities:

- **IAM Platform Administration:** Administered **Saviynt IGA** and **Microsoft Entra ID** — managing identity lifecycle, access provisioning, SCIM provisioning, and application integrations for 50+ enterprise SaaS and cloud applications, reducing provisioning time by **40%**.
- **JML Lifecycle Automation:** Designed and automated **Joiner/Mover/Leaver workflows** using **PowerShell and Microsoft Graph API** — ensuring day-one access for joiners, automated role changes for movers, and immediate deprovisioning for leavers, improving onboarding efficiency by **40%**.
- **CyberArk PAM:** Administered **CyberArk On-Prem PAM (PVWA, CPM, PSM)** — managing privileged account onboarding, automated password rotation, and PSM session recording, reducing standing privileged access by **30%**.
- **MFA & Conditional Access:** Configured **Microsoft Entra MFA** and **Conditional Access policies** — enforcing risk-based MFA, **FIDO2** security keys, and device compliance controls, reducing unauthorized access incidents by **35%**.
- **SSO & Federation:** Implemented **SAML 2.0, OAuth 2.0, and OIDC** SSO integrations across enterprise applications — enabling centralized authentication and automated **SCIM** provisioning.
- **Access Reviews & Compliance:** Conducted quarterly **access certification campaigns** — remediating **SoD** violations and producing audit-ready evidence, maintaining **100% SOX and HIPAA audit readiness**.
- **Automation:** Built **PowerShell and Python** automations for access lifecycle management, licence reporting, and governance enforcement — reducing manual IT effort by **50%**.
- **ServiceNow & On-Call:** Resolved IAM requests and incidents via **ServiceNow** — maintained **99.9% SLA adherence** across on-call rotations for mission-critical identity services.

Environment: Saviynt IGA (ISAA Certified), SailPoint IdentityNow/ISC, Microsoft Entra ID, Azure AD B2C, CyberArk PAM (PVWA/CPM/PSM), ForgeRock (AM/IDM/DS), IBM ISAM/WebSEAL (v9-10), Okta Auth0, Akeyless (Secrets & Key Management), AWS IAM, GCP IAM, SAML 2.0, OAuth 2.0, OIDC, SCIM, PowerShell, Python, Microsoft Graph API, Terraform, ServiceNow, SOX, HIPAA, Zero Trust.

Client: Dye & Durham, New Jersey
Role: IAM Analyst,

March 2024 to April 2025

Responsibilities:

- **IGA Platform Operations:** Administered **SailPoint IdentityIQ** and Microsoft Entra ID — managing identity lifecycle, access certifications, role assignments, and SCIM provisioning across 50+ enterprise applications, reducing access violations by **35%**.
- **JML Automation:** Automated **Joiner/Mover/Leaver workflows** using Microsoft Graph APIs — integrated with **Workday** HR system as source of truth, improving onboarding efficiency by **40%** and eliminating orphaned accounts.
- **MFA & Conditional Access:** Deployed **Microsoft Entra MFA** — configuring **Conditional Access policies**, FIDO2 security keys, and risk-based authentication, reducing unauthorized access by **35%**.
- **SSO & Federation:** Integrated 50+ SaaS applications using **SAML 2.0, OAuth 2.0, and OIDC** — enabling centralized SSO and automated SCIM provisioning.
- **Access Reviews & Governance:** Led quarterly **access certification campaigns** — enforcing **SoD** and least privilege, reducing privilege sprawl by **40%** and maintaining SOC 2 and ISO 27001 audit readiness.
- **Automation & Scripting:** Developed **PowerShell scripts** for bulk provisioning, licence management, and access reporting — reducing manual effort by **50%**.
- **ServiceNow & On-Call:** Managed IAM requests and incidents via **ServiceNow** — maintained **99% SLA adherence** across on-call rotations.

Environments: SailPoint IdentityIQ, Microsoft Entra ID, Conditional Access, PIM, Identity Governance, Azure AD Connect, MFA, FIDO2, SAML 2.0, OAuth 2.0, OIDC, SCIM, PowerShell, Microsoft Graph API, Workday HR Integration, ServiceNow, Terraform, SOC 2, ISO 27001, Zero Trust.

Client: CSS CORP PVT LTD
Role: IAM Engineer, Hyderabad

Feb 2019 to April 2023

Responsibilities:

- **IAM Architecture & Governance:** Designed and implemented enterprise **IAM governance frameworks** — **RBAC/ABAC** policies, identity lifecycle workflows, and access governance across **100+ enterprise applications** in multi-account AWS environments.
- **JML Lifecycle Automation:** Automated **Joiner/Mover/Leaver processes** using **Python (Lambda) and EventBridge** — enabling event-driven identity lifecycle management, reducing provisioning latency from hours to **minutes**.
- **Cloud IAM — AWS, Azure & GCP:** Managed **AWS IAM, Azure AD, and GCP IAM** — configuring roles, bindings, service accounts, and cross-cloud federation using **SAML 2.0 and OAuth 2.0**, supporting multi-cloud identity strategy.
- **Privileged Access Management:** Implemented **PAM controls** — designing approval-based role assumption workflows, enforcing least privilege, and managing secrets lifecycle using **AWS Secrets Manager and KMS**, reducing privileged attack surface by **40%**.
- **Terraform IaC:** Standardized IAM deployments using **Terraform modules** — enabling version-controlled, consistent identity configurations across dev, staging, and production environments.

- **Monitoring & Compliance:** Implemented IAM monitoring using **CloudTrail and IAM Access Analyzer** — detecting anomalous access patterns and producing audit evidence for **SOX, HIPAA, and NIST 800-53** compliance.
- **Automation:** Built **Python and PowerShell** automations for identity lifecycle, credential rotation, and governance reporting — reducing manual operations by **50%**.

Environment: AWS IAM, GCP IAM, Azure AD, Terraform, Python (Lambda), PowerShell, Bash, SAML 2.0, OAuth 2.0, OIDC, Workload Identity Federation, AWS Secrets Manager, KMS, IAM Access Analyzer, CloudTrail, ServiceNow, ISO 27001, SOX, HIPAA, NIST 800-53, Zero Trust.

Educational Details:

- Master of Science in Information Systems, Specialized in Cybersecurity | Pace University, New York, NY
